What's in the guide?

This guide is written to provide ease of reference within two simple sections: Reply Paid and Return Paid basics and Reply Paid barcoded letters.

In addition, there are specialised sections for domestic artwork layout, International artwork layout, unbarcoded letters and Return Paid parcels.

Section 1 – Reply Paid and Return Paid basics

This is essential reading and should be read first, as it covers the service at a glance, including features and benefits. This section provides you with a brief overview of the service and enough knowledge to ensure the correct solution has been selected for your mailing needs. You can then progress to the more detailed sections according to the type of Reply Paid service you require.

Section 2 – Reply Paid barcoded letters

This section provides the detail required to prepare barcoded articles ready for use within Australia (domestic), and articles for International Reply Paid. It covers areas such as size and weight, article type and paper stock requirements.

Section 3 – Reply Paid (domestic) barcoded artwork layout

This section provides detail about layout and addressing requirements of barcoded domestic articles, and needs to be read if you are making changes to the basic artwork supplied by Australia Post, for example adding your company logo, advertising or other printing.

Section 4 – International Reply Paid artwork layout

This section provides detail about layout and addressing requirements of International Reply Paid articles, and needs to be read if you are making changes to the basic artwork supplied by Australia Post, for example adding your company logo, advertising or other printing.

Section 5 – Reply Paid (domestic) unbarcoded letters

This section provides detail about unbarcoded, irregularly shaped and hand-addressed articles within Australia, including layout and addressing requirements.

Section 6 – Return Paid parcels

This section provides detail about parcels within Australia, including addressing requirements.

1. Reply Paid and Return Paid basics

1.1 What is Reply Paid?

1.1.1 Reply Paid letters (domestic) – barcoded and unbarcoded

Reply Paid is an Australia Post service for the delivery of response envelopes or cards to addresses within Australia.

Businesses typically use Reply Paid with preprinted barcoded envelopes that are inserted into a direct mail campaign, or ask the recipient to respond to a campaign using their own envelope and handwriting the Reply Paid address.

1.1.2 International Reply Paid letters

International Reply Paid letters allow you to extend your marketing campaign to the rest of the world and still offer respondents a no cost response mechanism. The International service is only available for Small articles up to 50 grams.

1.1.3 Return Paid parcels

The parcel service allows you to invite respondents to return parcels to you at no cost to the respondent. It applies only within Australia and is available only with assessed Parcel Post.

1.2 Why use Reply Paid?

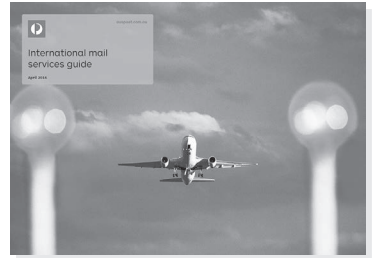

With Reply Paid, you can:

- use the service as a marketing tool, helping to encourage responses or provide a return service
- choose to personalise or brand your reply envelope or card
- provide an incentive to respondents by offering an easy, postage free way to respond in their own time
- choose Priority or Regular delivery timetables – Priority is only available for Reply Paid barcoded letters (domestic) that are addressed to a PO Box or Bag
- save on costs by only paying for replies received
- measure response to a campaign or mailout.

1.3 What qualifies for Reply Paid?

- There is no minimum quantity.
- Reply Paid letters (domestic) and Return Paid parcel services are only available and to be used in Australia.¹
- International Reply Paid is available in 180 countries – for full details refer to the *International mail services guide* (8833730) – shown at right.
- *Large Volume Recipient* (LVR) postcodes may not be used with Reply Paid. LVR postcodes are allocated to some organisations that receive large mail volumes.

Reply Paid is commonly used with preprinted barcoded envelopes or cards inserted with a direct mail campaign. Barcoded articles are designed to ensure that addressing and layout are compatible with Australia Post's automated letter sorting equipment which can efficiently process articles.

Supplementary services such as Registered Post or Signature on Delivery (SOD) can't be registered in conjunction with a Reply Paid or Return Paid service, however, respondents can choose to pay for them when lodging their Reply Paid/Return Paid article for return to you.

A Reply Paid address must specify the name or business name of the customer and a valid address of:

- the customer, or
- the authorised agent of the customer, or
- any other person who has provided written consent.

Responses may contain different names at one address if each name is:

- the registered name of a business carried out at that address by you, or
- the name of a company, partnership or association of which you are an employee or agent, and for which you have reason to receive Reply Paid articles at that address.

¹ Including External Territories: Lord Howe Island 2898, Norfolk Island 2899, Christmas Island 6798, Cocos (Keeling) Islands 6799 and Australian Antarctic Territories 7151.

1.4 How to apply

You need to apply to use the service by completing a *Reply Paid/Return Paid Application* (8837249) – available at Post Offices or on the Australia Post website at auspost.com.au/replypaid.

The image shows a screenshot of the 'Reply Paid/Return Paid - Application' form. The form is divided into several sections:

- Customer details:** Includes fields for Name, Address, City, State, and Postcode.
- Type of Reply Paid/Return Paid service:** Includes checkboxes for 'Standard' and 'Priority' services, and a section for 'Specialist Reply Paid services'.
- Reply Paid/Return Paid address details:** Includes fields for 'Reply Paid number' and 'Address'.
- Australia Post Business Credit Account:** Includes a section for 'Business credit account details'.

An Australia Post Business Credit Account is required to use the service.

Email the *Reply Paid/Return Paid Application* to the contacts detailed at the front of this guide, or lodge it at a Post Office.

When the application has been processed, Australia Post will send you an acceptance advice (normally by email), including:

- the Reply Paid number – this number forms part of the Reply Paid address and is a unique identifier for each customer
- the Reply Paid format or artwork including the unique barcode for the Reply Paid number.

1.4.1 The Reply Paid number

A Reply Paid number forms part of the Reply Paid address. It can only be issued or changed by Australia Post and may not be valid if you change your delivery address or cancel your Post Office Box. A Reply Paid number will remain registered until you advise Australia Post to cancel it.

1.4.2 In Your Capital City (IYCC) guidelines

If you have a Common Box¹ or Locked Bag then you can use an IN YOUR CAPITAL CITY address on barcoded domestic Reply Paid letters.

IN YOUR CAPITAL CITY addressing cannot be used with hand-addressed articles, parcels or International articles.

You have two options when setting up an IYCC service, depending on where you want the Reply Paid responses to be delivered – either to the capital city in the state in which each response is posted, or always to one specific city.

1 IYCC National to all capital cities in the IYCC network

This is used when you require responses to be delivered to the GPO of the state in which each response is posted. For example, a mail out is distributed to each state and the responses posted in Tasmania will be delivered to the GPO in Hobart.

The delivery address used must be a valid GPO Box or Locked Bag for each of the capital cities in the network – Brisbane, Melbourne, Sydney, Adelaide, Perth and Hobart. You can add Canberra and Darwin as extras if required.

2 IYCC to one specific city

This is used when you require all responses to be delivered to a specific capital city regardless of which state they are posted from. For example, the articles are distributed to multiple states but the replies are all delivered to the GPO in Melbourne.

The delivery address used must be a valid GPO Box or Locked Bag in the capital city where the mail will be delivered.

It is important to understand that artwork for both IYCC National **1** and IYCC to one specific city **2** appear identical. The only difference lies in the barcode.

For further information please contact the Reply Paid Coordinator in your state.

¹ Common Boxes are assigned to the postcode range 9800–9999.

1.4.3 Multiple Reply Paid numbers and response names

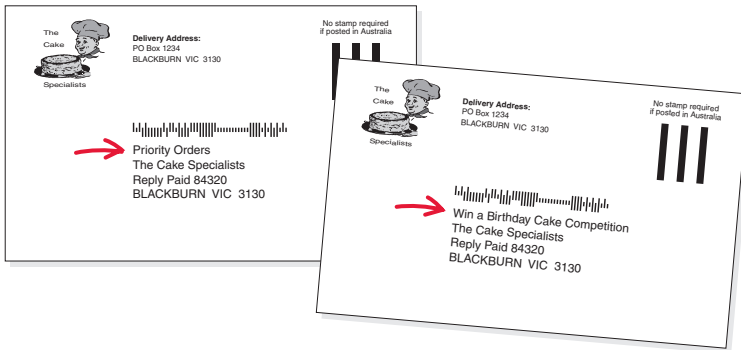

You may have:

- multiple Reply Paid numbers for different addresses
- multiple Reply Paid numbers to the one address, subject to availability and acceptance. (Additional charges will apply in relation to annual fees.)

As an alternative to multiple Reply Paid numbers, you may request multiple Reply Paid response names (at no additional charge) to the same Reply Paid (number) delivery address to suit different business purposes.

All responses must be registered with Australia Post using the *Reply Paid/Return Paid Application* form to add additional responses to an existing Reply Paid number.

▼ Examples of multiple Reply Paid names using the same Reply Paid number

In the two responses shown above, the delivery address and Reply Paid number is the same. However, the response name in the first lines of the Reply Paid address differ. You can easily sort responses to the appropriate business area.

Australia Post will sort and charge responses to the Reply Paid number only.

1.4.4 Changes to your existing Reply Paid service

You may apply, using a *Reply Paid/Return Paid Application* form, at any time to vary the Business Credit Account number or other details, including the name and address appearing in the Reply Paid response, provided the proposed changes comply with the requirements detailed in section 1.4.

Please note: when relocating or changing addresses you must not use the same Reply Paid number or barcode with different details. Please contact Australia Post prior to your move to discuss your options. In most cases a new Reply Paid service will need to be created at your new address.

Changes to the Reply Paid details may be obtained from Australia Post as required for up to two (2) Reply Paid addresses without prior notice. Change requests that require modification of more than two Reply Paid artworks will be actioned as and when processing allows. Should change requests be urgent, additional charges may be applied. Please speak with the Reply Paid Coordinator in your state. Refer to the contacts detailed at the front of this guide.

1.5 Cancellation of a Reply Paid or Return Paid service

Cancellation by customer

A customer may cancel a Reply Paid or Return Paid service by giving one month's written notice to Australia Post.

Cancellation by Australia Post

Australia Post may cancel a Reply Paid or Return Paid service by giving seven days' written notice to the customer if:

- the customer breaches any of the Reply Paid or Return Paid service terms and conditions
- the customer becomes or is in jeopardy of becoming insolvent
- the customer, being a company, passes a resolution or a court makes an order that the customer shall be wound up, or
- a receiver or manager on behalf of a creditor is appointed to the customer, or circumstances arise which entitles a court or creditor to appoint a receiver or manager to the customer.

Obligations of a customer after cancellation

When the service is no longer in force, the customer must cease to publish the Reply Paid or Return Paid address and must not issue any preprinted Reply Paid or Return Paid articles.

1.6 Preparation basics

Information in this section is designed to provide an overview of article preparation. More detailed information can be found in the Reply Paid barcoded letters section.

1.6.1 Article size, weight and type requirements for letters

Reply Paid is available for *Small* and *Large* size categories (Small only for International).

Articles can weigh up to 500 grams (50 grams for International).

Articles can be either enveloped or as postcards, and domestic articles can be in irregular shapes.

For Reply Paid letters (domestic), there are two ways you can encourage your recipients to respond:

- a preprinted barcoded envelope or card, commonly inserted with direct mail campaigns
- a Reply Paid address, whereby recipients use their own envelope and respond to an offer by handwriting the Reply Paid address from a TV, radio, newspaper, direct mail or other advertising medium.

For International Reply Paid, preprinted barcoded envelopes or cards must be used.

[†] The length must be at least 1.414 times the width.

→ See section 2.2

1.6.2 Article size requirements for parcels

Parcels vary in size. Generally speaking, articles not fitting within the size ranges listed for letters could be considered a parcel.

Detailed information about parcels is available from the *Domestic parcels guide* (8833732).

→ See section 6

1.6.3 Correct addressing requirements for letters (domestic)

Barcoded letters

Australia Post will provide the basic artwork in PDF format free of charge – suitable for printing onto envelopes or cards. The artwork is complete and ready to use.

You, or your authorised printer, may modify the artwork to add your logo or other branding providing you observe the conditions in section 3. Changes to address details should be obtained from Australia Post if required.

The artwork includes a barcode, which facilitates faster processing of articles, and with correct formatting, assists in processing and cost reduction, meaning lower rates for you.

Along with the barcode, the artwork will have the correctly formatted Reply Paid address and the other inscriptions, so you do not have to create the artwork yourself.

Articles need the addressed side to be printed with:

- 1 your logo or branding (optional)
- 2 a delivery address that observes the correct addressing conditions
- 3 the Reply Paid address (including barcode) that observes the correct addressing conditions
- 4 the Priority delivery indicator, if this delivery timetable is selected
- 5 the Reply Paid imprint, containing three vertical bars and the text **“No stamp required if posted in Australia”**. The bars are required so mail processing equipment can recognise a Reply Paid article.

Any logos, advertising and other printing added to articles must follow the requirements for clear zones on the front and back of articles.

→ See section 3 (domestic) and section 4 (International)

Unbarcoded letters

Articles that do not comply with the barcoded correct addressing requirements, or are irregularly shaped, may instead be eligible for the unbarcoded articles pricing category. The correct addressing requirements for unbarcoded articles are simpler to observe.

Articles need the addressed side to be printed with:

- 1 your logo or branding (optional)
- 2 the delivery address (preferred, but not mandatory)
- 3 the Reply Paid address that observes the correct addressing conditions (mandatory).
The inclusion of an address barcode is discouraged.
- 4 the Reply Paid imprint (preferred, but not mandatory).

→ See section 5.3

Hand-addressed letters

When inviting respondents to address their own article, you must ensure that the address is correctly represented in your promotional material and that respondents are asked to follow its format.

You must indicate in your advertisement that **“No stamp is required”**, and advise respondents the Reply Paid name and address details.

▼ Example of a hand-addressed Reply Paid article

→ See section 5.4

1.7 Delivery timetables

Reply Paid is delivered with letters and other mail.

Two delivery timetables are available:

- **Priority delivery** – only available for Reply Paid barcoded letters (domestic) that are addressed to a PO Box or Bag – refer to the following timetable (in business days):

For delivery:	Same state	Other state
Within metropolitan areas of capital cities or within the same city or town and environs	1 day	—
Between metropolitan areas of capital cities	—	2 days
Between metropolitan areas of capital cities and country locations	2 days	3 days
Between country locations	2 days	4 days

- **Regular delivery** – Add up to two additional business days on top of the Priority timetable.

These timetables are guidelines only and based on reasonable expectations and experience. Australia Post will not be liable for any loss or damage (including but not limited to consequential loss) resulting from a failure to deliver in accordance with these timetables.

1.7.1 Delivery to Post Offices Boxes

The best and most efficient way to receive Reply Paid mail is via a Post Office Box or locked bag, as it may be received earlier than street deliveries. Of course you can choose to have mail delivered to your street address.

If you already have a Post Office Box or locked bag, it may be used as the delivery address (when your Reply Paid application has been approved).

If you wish to use this facility, but don't have a box or bag, you should apply for the box or bag at your local Post Office before applying for a Reply Paid number.

Priority delivery is only available for Reply Paid barcoded letters (domestic) that are addressed to a Post Office Box or bag.

1.7.2 Undeliverable articles

Reply Paid may be considered undeliverable if:

- it is incorrectly addressed or has an incorrect barcode
- you have moved without notification
- you have cancelled the Reply Paid number
- you have cancelled, or Australia Post has cancelled your Business Credit Account
- delivery is prohibited by law.

Undeliverable mail may be destroyed.

1.8 What will it cost?

Current pricing is listed in the *Post charges* booklet (8833665), which can be obtained from any Post Office, or downloaded from auspost.com.au.

The Annual Fee applies to each Reply Paid letters (domestic) service and each Return Paid parcels service you register and will be automatically billed to your Business Credit Account on the anniversary month of commencement.

1.8.1 Reply Paid letters (domestic)

Annual fee plus price per article received.

The prices for Reply Paid articles vary by size and weight category, addressing format and the delivery timetable, as displayed in the following table:

Size category	Weight up to	Barcoded letters – to PO Box / Bag	Barcoded letters – other	Unbarcoded letters			
		Correctly preprinted barcoded articles addressed to a PO Box or Bag	Correctly preprinted barcoded articles addressed to street address or other	<ul style="list-style-type: none"> Articles which are preprinted but not barcoded or correctly formatted Irregularly shaped articles Hand-addressed articles

1.8.2 International Reply Paid letters

Note: Additional charges will apply for International Reply Paid articles that contravene addressing and formatting standards, or are incorrectly addressed.

The Application Fee for International Reply Paid will be charged to your Business Credit Account when you lodge an application for the service.

1.8.3 Return Paid parcels

Annual fee plus price per parcel received.

The prices for Return Paid parcels vary by weight:

- Up to 500g
- Over 500g–3kg
- Over 3kg–5kg
- Over 5kg–10kg
- Over 10kg–22kg.

1.8.4 Billing and payment

Payment for the service must be made by Australia Post Business Credit Account. To apply please call 13 11 18. This Business Credit Account is centrally administered and is required because Reply Paid is charged after delivery is made – this differs from the ordinary prepaying of postage. Statements are issued on a monthly basis.

You are obliged to pay all Reply Paid or Return Paid fees and charges for each article delivered, whether accepted or refused. Given the nature of the service, assessment of charges is made at the end point of delivery. Articles have been transported within the Australia Post network and costs incurred.

2.2.1 Article size and weight

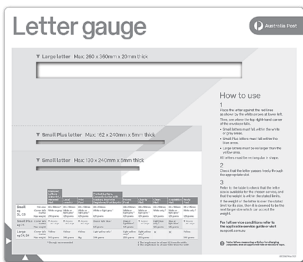

The size categories eligible for the Reply Paid domestic service are *Small* and *Large*.

Any article with any measurement that exceeds the Large article limits is a “parcel” size. See Section 6 – Return Paid parcels.

The only size category eligible for the International Reply Paid service is *Small*.

	Domestic		International

Maximum weight	125g	500g Pricing applies in three weight steps of: Up to 125g, 250g and 500g	50g

You can obtain a convenient *Letter gauge* (8833667) from your lodgement facility to assist in measuring domestic articles.

2.2.2 Article shape for barcoded and International articles

Small articles should be rectangular in shape (not square) and should not have a ratio of less than 1.414 (length divided by height).

For example, 145mm L divided by 130mm H = 1.11, this is less than 1.414 and will be charged as unbarcoded Reply Paid articles, irrespective of a barcode.

See section 5.2.1 for details of article shape for unbarcoded or irregularly shaped articles.

2.2.3 Article type

Reply Paid articles can be preprinted onto an envelope, card or self mailer.

Australia Post will supply the artwork ready for the addition of logos or branding, suitable for printing envelopes, cards and self mailers.

Postcards

See section 3.6.3 (domestic) or section 4.8.3 (International) for example layouts showing how to maximise the space available on the front of your postcard for the advertising or other printing.

Self mailers

A self mailer is usually a single sheet of paper, folded to Small article size and must be able to be sealed on all sides with high quality glue. The article may be comprised of more than one sheet of paper if one sealed piece completely encloses the others.

Window faced envelopes

Window faced envelopes are not recommended in conjunction with the Reply Paid service. Australia Post recommends that you encourage replies by inserting a Reply Paid envelope, card or self-mailer inside the outgoing envelope.

If you specifically require the use of panel or window faced envelopes, specifications may be obtained by emailing the contacts detailed at the front of this guide, and a sample will be required to be submitted.

2.2.4 Paper stock

Paper stock is an important consideration as it can affect the ability of high speed letter sorting equipment to process articles without damage.

Australia Post recommends that envelopes and cards comply with Australian Standards for the production of envelopes, Spec 4611 – 1999 (available at: <https://infostore.saiglobal.com>). For details refer to your paper supplier or envelope manufacturer or visit auspost.com.au/bulkmail. See Section 2.4 Testing.

Paper stock colour

Australia Post recommends white paper or card for your articles, but light tints or half-tones are satisfactory. A general test is that the colours should come on or around the following range of 78 acceptable colour tones selected from the Pantone Matching System®.

100	101	106	107	113	114	120	121	127	128	134	135	136	141
142	148	149	155	162	169	176	196	203	217	250	263	277	290
304	317	331	332	337	344	351	358	365	366	372	373	379	386
393	400	406	413	427	434	441	453	454	460	461	467	468	474
475	482	488	489	496	502	503	510	517	524	530	531	538	545
552	559	566	573	579	580	586	587						

These 78 acceptable colours are shown at the back of this guide.

Because of the existence of subjective factors such as the varying degrees of colour perception and the varying conditions under which colours are viewed, cases may arise where doubt exists on acceptability of a particular colour. Australia Post can arrange a test, based on the above zone of acceptable colours.

2.2.5 Sealing of articles

Australia Post recommends each article be secured in a manner which would prevent entrapment of other postal articles. Any opening must not exceed 88mm.

If you are preparing a “self-mailer” incorporating gum that your respondent must moisten around the edges before folding to seal, ensure that your printer applies sufficient gum on all the necessary edges so that no opening greater than 88mm remains after sealing.

Each article must be secured by a fastening that is *not likely to damage other postal articles nor injure persons handling it*. Where fasteners are used, they must be appropriate to the thickness of the article, and the ends closed together. Staples and any metal fasteners are discouraged, as they are likely to cause injury to staff handling the articles.

2.2.6 Article flexibility

Small size category articles must be reasonably flexible to ensure that they can be processed through high speed letter sorting equipment.

Small size articles that are too rigid or stiff are ineligible for the service (but may be accepted as Large articles). You need to consider the nature of the contents that your respondents will be enclosing in the Reply Paid envelopes. Some examples of prohibited contents includes pencils, pens and items enclosed in a hard case.

2.3 Artwork and printing

To assist you in correctly addressing and formatting articles, Australia Post provides the basic artwork, in PDF format, for small and large letters.

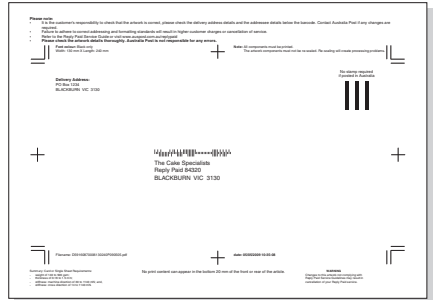

You need to check the artwork provided by Australia Post to ensure that all your details (excluding the barcode) are correct. Australia Post is not responsible for incorrect details. If your details are incorrect (in the artwork), please respond to the email or letter which accompanied your artwork PDF file. See section 2.4 Testing.

If you are preprinting unbarcoded or irregularly shaped articles then the artwork supplied by Australia Post should be modified to remove the barcode. See section 5.3.

If you are altering the artwork that is supplied by Australia Post, for example adding a logo or other printing, you will need to ensure that it still meets all of the layout and formatting requirements. See section 3 and section 4.

You are responsible for the print quality of the articles.

Note: Desktop printing of Reply Paid artwork (laser or inkjet) is not recommended, and is unlikely to align or meet barcode specifications. The printing of barcoded Reply Paid addresses on labels is not acceptable for use in processing Reply Paid.

2.3.1 Australia Post changes to Reply Paid layout

Australia Post reserves the right, at reasonable notice, to require you to change the design or any other feature of a previously approved Reply Paid number or response.

Should incorrect details (such as the barcode, postcode or delivery address) be printed on an article, Australia Post may at its discretion remove the mail from processing and make request for additional payments as a result of increased processing requirements.

2.3.2 A quick printing checklist

If you have been recently issued with artwork by Australia Post, then check the following before you proceed with printing.

Do ensure:

- ✓ Article size will be the same as shown in the artwork.
- ✓ Paper stock meets Australian Standards for the production of envelopes and approximates colour recommendations.
- ✓ Reply Paid numbers issued by Australia Post are valid.
- ✓ All of the addressing details on the artwork are correct.
- ✓ Dark coloured ink will be used for printing – red, orange or yellow ink will not be used.
- ✓ The printing company will print the artwork as is, with any changes or modifications to the artwork PDF supplied by Australia Post made according to specifications only.

Don't:

- ✗ use or create a Reply Paid number before you have been issued with Reply Paid details and artwork to do so
- ✗ use a domestic letter barcode which has not been specifically issued for the Reply Paid number or response name
- ✗ continue to use a Reply Paid number when it has been cancelled or when you have moved address, or cancelled a box or bag service associated with the Reply Paid number
- ✗ act as an agent using a Reply Paid number without written approval from the customer and advice to Australia Post
- ✗ use stick-on labels for addressing barcoded letter articles.

2.4 Testing

If you are concerned that your articles may not satisfy all service requirements you can request a preliminary test. Tests can be conducted on the following:

- shape
- article colour, patterns or watermarks
- paper stock quality
- flexibility
- correct addressing compliance
- positioning of logos, advertising and other printing.

Testing involves processing a sample of articles to determine if they are suitable for machine processing. Articles that pass the test will be accepted at the relevant price, provided that all other requirements have been met.

Requests for testing should be directed to either your Australia Post account manager, or the Reply Paid Coordinator in your state, detailed at the front of this guide.

Barcode Quality Program

Australia Post provides the Barcode Quality Program (BQP) to both customers and suppliers to test the quality of barcodes prior to the print production stage. Information on BQP is available on the Australia Post website at auspost.com.au/bqp.

Enquiries about barcode readability should be directed to BQPHelp@auspost.com.au.

2.5 Summary checklist

Reply Paid preparation involves:

- ✓ Checking the size and weight of the article to ensure it is acceptable.
- ✓ Ensuring the type of article chosen is acceptable.
- ✓ Checking that all of the addressing details on the artwork are correct.

3. Reply Paid (domestic) barcoded artwork layout

This section covers in detail all the information you need to lay out the artwork for domestic barcoded Reply Paid small articles.

Read this section if you are altering the artwork that is supplied by Australia Post, for example adding a logo or other printing.

You don't need to read this section if you will be using the artwork supplied by Australia Post without any changes.

Australia Post will provide the basic artwork in print ready format (PDF), ready for the inclusion of your logo and branding if required. You are responsible for all artwork supplied to a printer of envelopes or cards.

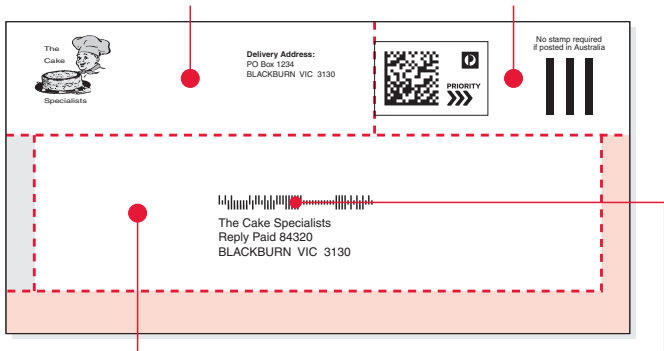

Note: Australia Post also provides artwork formatted for large letters, when requested in the Reply Paid application.

See section 5 for articles that do not comply with these barcoded correct addressing requirements, or are irregularly shaped.

3.1 Article layout and zones

Reply Paid domestic barcoded letter articles are made up of three printing zones. The following sections detail the dimensions of these zones, and specify the inscriptions to print within them.

Delivery address zone section 3.3 **Postage zone** section 3.2

Barcode and Reply Paid address zone section 3.4 **Barcode** section 3.5

See also, **Adding logos, advertising and other printing** section 3.6.

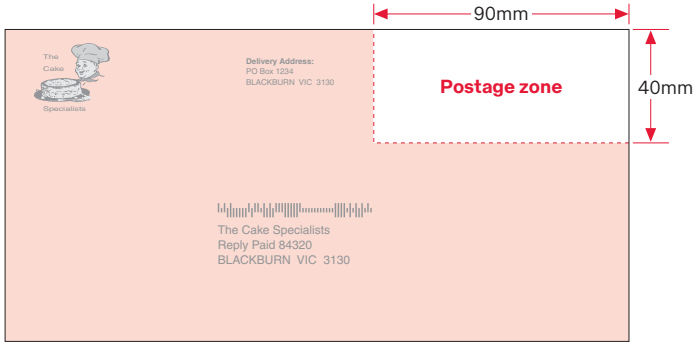

3.1.1 Colour of inscriptions

Dark inks such as black, dark blue and dark green are preferred. Red, orange and yellow inks must not be used.

3.2 Postage zone

The postage zone contains the Reply Paid imprint, and a Priority delivery indicator if the Priority delivery timetable is selected. Dimensions must be:

- 90mm across from the top right-hand corner of the article
- 40mm down from the top edge of the article.

3.2.1 Reply Paid Imprint

All domestic barcoded artwork must bear a Reply Paid imprint located within the postage zone.

The imprint contains:

- **three vertical bars** – 2.5mm (± 0.5 mm) wide \times 20mm (± 2 mm) high, spaced 4.5mm (± 1 mm) apart and positioned 13mm (± 3 mm) from both the top and right-hand edges of the article.
- the text **“No Stamp required if posted in Australia”** – centred at least 3mm above the three vertical bars. Font style for text: Helvetica 8 point.

Should the imprint be incorrectly printed, articles may be rejected.

Note: Charities can print inscriptions that ask the person making a donation to further assist the charity by placing a stamp on the envelope. Charities are required to obtain approval and specifications from Australia Post by contacting the Reply Paid Coordinator in their state, prior to adding any additional information in the postage zone.

Please note that the Postage Paid Imprint should not be used on Reply Paid artwork.

3.2.2 Priority delivery indicator

All articles for which the Priority delivery timetable is selected should include a Priority delivery indicator, located within the postage zone, to the left of the Reply Paid Imprint.

The Priority delivery indicator must consist of:

- 1 a rectangular box with the dimensions of 40mm wide × 26mm high, located at 50mm (recommended) from the right-hand edge of the article
- 2 a GS1 compliant 2D barcode to Australia Post specifications
- 3 the Australia Post logo
- 4 the word PRIORITY – printed in black capital letters, in a bold font.

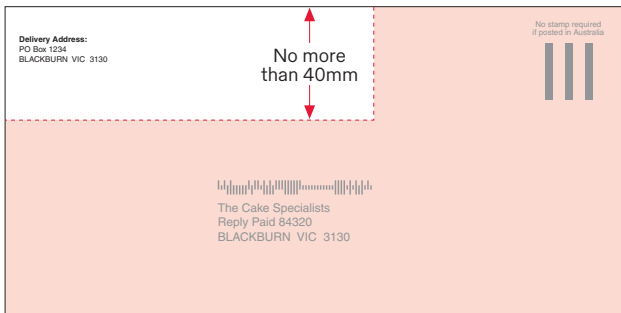

When you register a Reply Paid service with Priority delivery, Australia Post will provide artwork which includes a Priority delivery indicator.

3.3 Delivery address zone

The delivery address zone contains the physical delivery address which is used by postal delivery officers who manually sort and deliver the articles.

The delivery address zone must be:

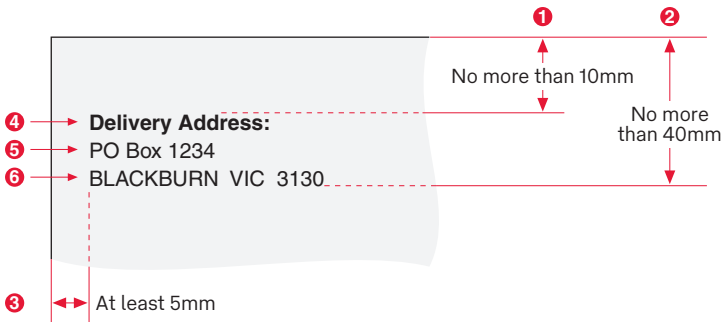

- located at the top of the article – extending from the left edge across to the postage zone
- no more than 40mm deep.

3.3.1 Delivery address layout

The delivery address must be positioned in the delivery address zone of the article:

- ❶ No more than 10mm from the top edge of the article.
- ❷ Extending to no more than 40mm down from the top edge of the article.
- ❸ At least 5mm from the left edge of the article.
- ❹ **The heading “Delivery Address:”** – the recommended font is **Helvetica Bold 8 point**.
- ❺ **First line to second last line** – Must contain the number and name of the street or thoroughfare or Post Office Box or bag number. The recommended font is Helvetica 8 point.
- ❻ **Bottom line** – Must contain in the following order: the locality (or the name of the office of delivery), the state or territory abbreviation and finally the postcode. This line is to be printed in CAPITALS with no punctuation and no underlining. Leave one or two spaces only between the locality, state or territory abbreviation and the postcode. The recommended font is Helvetica 8 point.

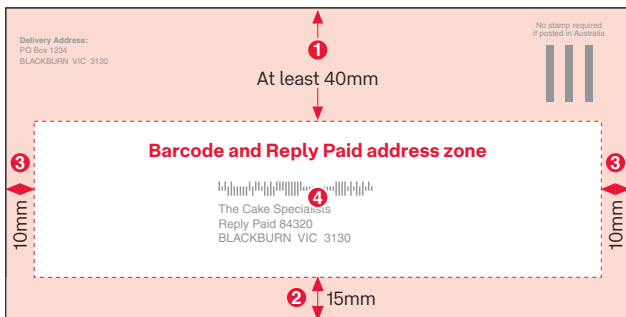

3.4 Barcode and Reply Paid address zone

Contains the Reply Paid address and barcode.

The complete Reply Paid address and barcode must be positioned in the Barcode and Reply Paid address zone of the article:

- 1 at least 40mm from the top edge of the article
- 2 at least 15mm from the bottom edge of the article
- 3 at least 10mm from the left and right edges of the article
- 4 centred on the article if possible.

3.4.1 Address layout

Correct addressing conditions ensure the Australia Post delivery system can recognise and interpret the delivery address.

- ❶ **Address lines** (excluding barcode placement) must be aligned left.
- ❷ **Barcode** – see section 3.5 for barcode requirements.
- ❸ **First line** – to contain the name of addressee (Business or personal name).
- ❹ **Second line (and if necessary, third line)** – to contain “Attention of:” or other reference details.
- ❺ **Second last line** – to contain the text “Reply Paid” followed by the Reply Paid number.
- ❻ **Bottom line** – Must contain in the following order: the locality (or the name of the office of delivery), the state or territory abbreviation and finally the postcode.
This line is to be printed in CAPITALS with no punctuation and no underlining.
Leave one or two spaces only between the locality, state or territory abbreviation and the postcode.

3.4.2 Address fonts and colours

In addition to Reply Paid address formatting, articles need to comply with the following mandatory address font requirements:

- Fixed pitch fonts are recommended (such as Courier or OCRB, 12 point, 10 pitch). In fixed pitch fonts every character has the same width.

example: Mr A Sample
| | | | | | | | | |

- If proportional fonts are used, it is preferred they be structured in 12 point, ideally Helvetica or Times 12 point. Print characters must not touch or overlap. In proportional fonts different characters have different widths.

example: Mr A Sample
| | | | | | | | | |

Australia Post will provide artwork using Helvetica 12 point.

- Artistic or script fonts must not be used. For example: cursive, fancy style fonts such as Brush Script.

example: ~~Mr A Sample~~

- Print characters are acceptable between 1.8mm and 7.0mm high, and between 0.3mm and 7.0mm wide. The ideal height is between 2.0mm and 4.0mm (upper case characters of nominal 10 point and 12 point type generally fall within this range). Line spacing should be between 1.0mm and 2.5mm.
- Attributes such as *italics*, **bolding**, shadowing, or underlining are not permitted.
- Dark inks such as black, dark blue and dark green are preferred. Red, orange and yellow inks must not be used.

3.5 Reply Paid barcode

When using Reply Paid with a domestic letter article, Australia Post will provide artwork which includes a barcode.

If cutting and pasting the address zone artwork DO NOT resize the barcode.

The barcode is not transferable should you relocate. *The Reply Paid barcode is unique and cannot, and should not, be used if you have changed address or location.*

Because barcode details are unique, if a wrong barcode is used, the article will be routed to the wrong location and be severely delayed, misdirected, or may be rejected.

Even though barcodes representing different delivery points can look nearly identical, the correct barcode is essential.

The barcode used in regular mail delivery may not be used for Reply Paid.

Additional charges will apply if an incorrect barcode is used.

3.5.1 Barcode location

The barcode must be printed at least 2mm above the first line of the Reply Paid address, and within the Barcode and Reply Paid address zone.

3.5.2 Barcode clear zone

Barcodes require a clear zone that must be kept blank (free of printing or other distractions) immediately above, below, and to the left and right of the barcode. This is to ensure that the barcode can be detected by the reader and processed correctly.

There must be a clear zone (no printing) around the barcode of at least 6mm to the left and right and at least 2mm from the top and bottom.

3.6 Adding logos, advertising and other printing

If you are adding logos, advertising or any other additional printing to your articles you need to consider the following questions so that your articles can be processed by our automated sorting equipment:

- *location* – is it in a clear zone or not? See section 3.6.1.
- *colour* – does it approximate an approved colour or not? See the colour chart at the back of this guide.

Some examples of other printing are company logos or slogans, advertising/marketing, watermarks and “open here” instructions on a re-usable envelope.

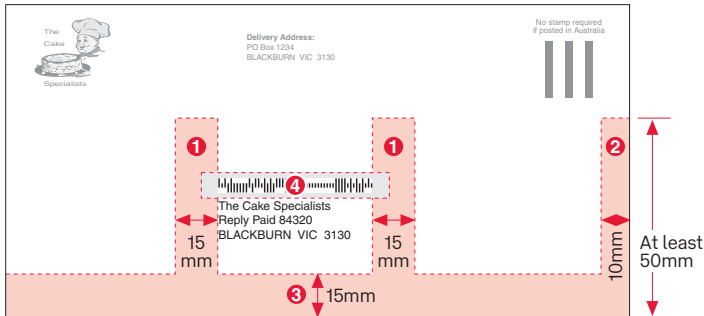

If you are unsure please refer to the contact details in section 2.4 Testing.

3.6.1 Printing in the clear zones

Any colour within the clear zones must approximate an approved colour.

The clear zones are:

- 1 On the front of the article – at least 15mm clear from the left and right sides of the Reply Paid address and barcode and at least 50mm high
- 2 On the front of the article – at least 10mm clear from the right edge and at least 50mm high.
- 3 On the front of the article – at least 15mm clear from the bottom edge.
- 4 See section 3.5.2 for details on the Barcode clear zone.

- 5 On the back of the article – at least 20mm clear from the bottom edge, extending for 130mm from the left edge. If possible also keep clear the area extending to the right edge.

3.7 Examples of correct and incorrect domestic barcoded articles

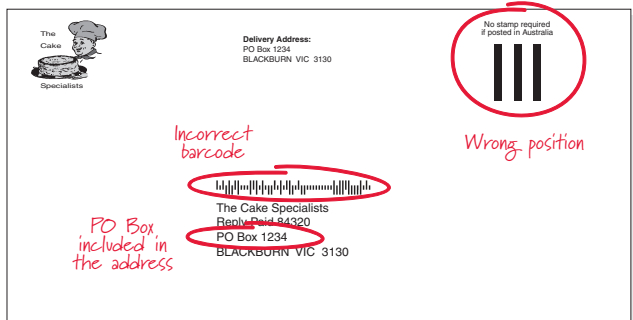

3.7.1 Example of a correct article

3.7.2 Examples of incorrect articles

A.

- ✗ The barcode is incorrect – did the printer copy it from their previous artwork?
- ✗ The Reply Paid address should not include a Post Office Box – it should only be in the delivery address.
- ✗ The Reply Paid Imprint is too far to the left – perhaps this artwork has been printed onto a larger envelope than it should be.

B.

- ✗ The barcode is too small and very poor quality – take care if you “copy and paste” the artwork.
- ✗ The Priority delivery indicator is “low-resolution” and very poor quality – it is important that it prints clearly so that it can be correctly scanned by Australia Post’s equipment.
- ✗ The “Postage Paid” imprint is the incorrect imprint.
- ✗ The address is in a stylised font with characters that touch or overlap – see section 3.4.2 for details on address font requirements.

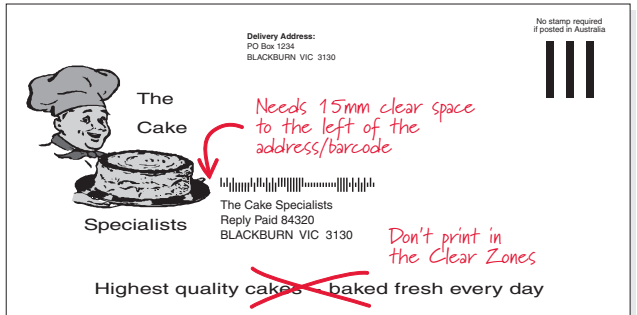

C.

- ✗ The delivery address and the Reply Paid barcode are both missing.
- ✗ The “No Stamp Required” imprint is the incorrect imprint.
- ✗ This example appears to be “home made” artwork. Always use the artwork provided by Australia Post if at all possible.

D.

- ✗ There should be at least 15mm clear space to the left of the Reply Paid address and barcode.
- ✗ The bottom 15mm of the article is a Clear Zone. If you need a lot of space for your logo, advertising or other printing, see section 3.6.3.

3.8 Summary checklist

Reply Paid domestic barcoded artwork layout involves:

- ✔ Ensuring all inscriptions are displayed on the article.
- ✔ Ensuring all correct addressing guidelines are followed.
- ✔ Ensuring all clear zones are followed.
- ✔ Checking the correct and incorrect examples of articles prior to printing.

4.6 International Reply Paid barcode

Australia Post will provide artwork which includes a barcode.

If cutting and pasting the address zone artwork DO NOT resize the barcode.

The barcode is not transferable should you relocate. *The Reply Paid barcode is unique and cannot, and should not, be used if you have changed address or location.*

Because barcode details are unique, if a wrong barcode is used, the article will be routed to the wrong location and be severely delayed, misdirected, or may be rejected.

Even though barcodes representing different delivery points can look nearly identical, the correct barcode is essential.

The barcode used in regular mail delivery may not be used for Reply Paid.

4.6.1 Barcode location

The barcode must be printed at least 2mm above the first line of the Reply Paid address, and within the Reply Paid address zone.

- 2 The inscription must be at least 15mm above the bottom of the article.

4.8 Adding logos, advertising and other printing

If you are adding logos, advertising or any other additional printing to your articles you need to follow the requirements for clear zones, so that your articles can be processed by our automated sorting equipment.

Some examples of other printing are company logos or slogans, advertising / marketing, watermarks and “open here” instructions on a re-usable envelope.

Logos, advertising and other printing must not mimic the horizontal lines of the International Reply Paid logo, and also must not contain an address, either complete or partial.

If you are unsure please refer to the contact details in section 2.4 Testing.

4.8.1 No printing in the clear zones

Printing of any kind is not permitted within the clear zones of International Reply Paid articles. The clear zones are:

- 3 On the front of the article – at least 15mm clear from the bottom edge.
- 4 See section 4.6.2 for details on the Barcode clear zone.

- 5 On the back of the article – at least 15mm clear from the bottom edge of the article extending for the full width of the article.

4.8.2 Printing outside of the clear zones

Printing elsewhere on the front of the article can be of any kind and in any colour, providing that it extends no closer than 40mm from the top edge.

4.8.3 How to maximise space for other printing (eg postcards)

The illustration below suggests how to maximise the space available on the envelope or postcard for your logo, advertising or other printing.

To optimise article layout:

- 1 move the International Reply Paid logo, barcode and address as far to the right as possible – **no closer than 15mm from the right edge of the article**
- 2 keep below 40mm from the top edge
- 3 keep 15mm clear to the left of the International Reply Paid logo, barcode and address
- 4 the clear zone of 15mm at the bottom edge of the article must be kept clear of any printing
- 5 the remaining space on the left side of the article may be used for the logo, advertising or other printing.

The barcode size, and the font sizes for the inscriptions must not be reduced.

4.9 Summary checklist

International Reply Paid artwork layout involves:

- ✓ Ensuring all inscriptions are displayed on the article.
- ✓ Ensuring all correct addressing guidelines are followed.
- ✓ Ensuring all clear zones are followed.

5. Reply Paid (domestic) unbarcoded letters

This section provides detailed information about unbarcoded (domestic) letters.

5.1 Unbarcoded letters overview

The unbarcoded letters pricing category applies to:

- articles that do not comply with the barcoded correct addressing requirements, for example, because the barcode or other inscriptions are not correctly printed
- articles that are irregularly shaped, for example, square, oval, star, etc
- articles that are hand-addressed (or typed) by the recipient, using their own envelope.

Unbarcoded articles are not available for International Reply Paid letters.

5.2 Article characteristics

5.2.1 Article shape

When designing irregularly shaped articles, Australia Post recommends that the following be considered:

- avoid shapes which have narrow parts that may tear, get entangled with other articles, cause injury to people or damage to postal equipment
- articles must have sufficient area to clearly display the inscriptions, which are detailed in section 5.3.
- the size of letter box apertures to accommodate the article.

▼ Some suitable shapes for Reply Paid unbarcoded letters

▼ Some shapes not recommended for Reply Paid unbarcoded letters

Not recommended because the long legs are likely to bend or break off during mail carriage.

Not recommended because the shape is likely to become entangled with other mail articles.

Not recommended because there is insufficient area to clearly show the Reply Paid address, delivery address and Reply Paid Imprint.

5.2.2 Paper stock

Australia Post recommends that envelopes and cards comply with Australian Standards for the production of envelopes, Spec 4611 – 1999 (available at: <https://infostore.saiglobal.com>). For details refer to your paper supplier or envelope manufacturer or visit auspost.com.au/bulkmail. See Section 2.4 Testing.

5.2.3 Sealing of articles

Australia Post recommends each article be secured in a manner which would prevent entrapment of other postal articles. Any opening must not exceed 88mm.

If you are preparing a “self-mailer” incorporating gum that your respondent must moisten around the edges before folding to seal, ensure that your printer applies sufficient gum on all the necessary edges so that no opening greater than 88mm remains after sealing.

Each article must be secured by a fastening that is *not likely to damage other postal articles nor injure persons handling it*. Where fasteners are used, they must be appropriate to the thickness of the article, and the ends closed together. Staples and any metal fasteners are discouraged, as they are likely to cause injury to staff handling the articles.

5.2.4 Article flexibility

Small size category articles must be reasonably flexible to ensure that they can be processed through high speed letter sorting equipment.

You need to consider the nature of the contents that your respondents will be enclosing in the Reply Paid envelopes. Some examples of prohibited contents includes pencils, pens and items enclosed in a hard case.

Hand-addressed Small size articles that are too rigid or stiff may be accepted as Large articles.

5.3 Article layout

Because unbarcoded or irregularly shaped articles follow a specialised processing stream, specific zones do not apply – allowing flexibility in the placement of the address and inscriptions.

The following sections specify the inscriptions required:

- ❶ **Reply Paid Imprint** section 5.3.1
- ❷ **Delivery address** section 5.3.2
- ❸ **Reply Paid address** section 5.3.3

Variations to these requirements should be submitted for approval. See section 2.4 Testing.

5.3.1 Reply Paid Imprint

Inclusion of the Reply Paid Imprint is encouraged but not mandatory for unbarcoded articles.

See section 3.2.1 for further details on the layout of the Reply Paid Imprint.

The Reply Paid Imprint should be positioned on the address side of the article, above and to the right of the Reply Paid address.

5.3.2 Delivery address

The physical delivery address which is used by postal delivery officers who manually sort and deliver the articles.

Inclusion of the delivery address is encouraged but not mandatory for unbarcoded articles.

See section 3.3.1 for further details on the layout of the delivery address.

The delivery address should be positioned on the address side of the article, above the Reply Paid address.

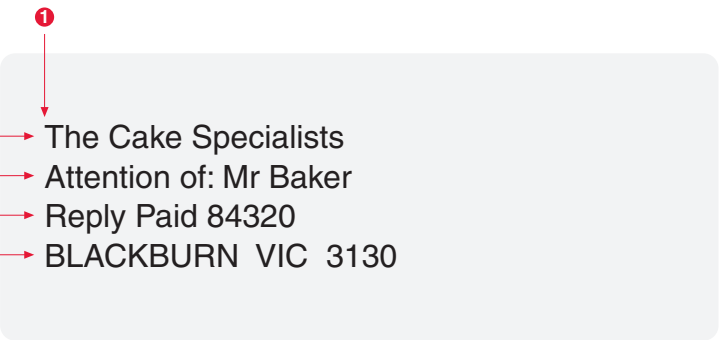

Delivery Address:
PO Box 1234
BLACKBURN VIC 3130

5.3.3 Reply Paid address

The Reply Paid address is a mandatory inscription.

Correct addressing conditions ensure the Australia Post delivery system can recognise and interpret the Reply Paid address.

- ❶ **Address lines** should be aligned left.
- ❷ **First line** – to contain the name of addressee (Business or personal name).
- ❸ **Second line (and if necessary, third line)** – to contain “Attention of:” or other reference details.
- ❹ **Second last line** – to contain the text “**Reply Paid**” followed by the Reply Paid number.
- ❺ **Bottom line** – Must contain in the following order: the locality, the state or territory abbreviation and the postcode. This line is to be printed in CAPITALS.

Any font can be used for the address as long as it is clearly readable, preferably in 12 point size.

Inclusion of the Reply Paid barcode is discouraged. If you use the basic artwork which is provided by Australia Post you should remove the barcode.

5.4 Hand-addressing overview

An alternative to a preprinted envelope, card or self mailer is that you may ask your recipient to respond by using their own envelope with the Reply Paid address hand-addressed (or typed) by the recipient.

Hand-addressing is not available for International Reply Paid letters.

5.5 How to ensure correct hand-addressing

When respondents are invited to address their own envelope, please ensure that the address is correctly represented in your promotional material and respondents are asked to follow its format.

- 1 Advise respondents your Reply Paid name and address details.
- 2 Indicate in your advertisement that **“No stamp is required”**.

Australia Post will deem the new Return Paid service customer to have accepted all the conditions of the service as issued to the relinquishing customer.
